Notes:
 aspenONE Engineering suite consists of the following products:
 Aspen Plus family, Aspen HYSYS family, Aspen Exchanger Design & Rating (EDR), Aspen Economic Evaluation (EE), Aspen Basic Engineering (ABE), aspenONE Web Server, and aspenONE Exchange.

Suite	Engineering Suite							
V10 Platform Specifications that are supported	AES Property System 32-bit	Process Modeling (Aspen Plus) 32-bit	Exchanger Design & Rating (EDR) 32-bit ²	Process Modeling (Aspen HYSYS) 32-bit	Economic Evaluation (EE) 32-bit	Basic Engineering Client	Basic Engineering Server	Aspen Online (AOL)

* In general, AspenTech aspenONE® software license agreements with customers permit use of the licensed software on Supported Computers at customer Sites. "Supported Computers" include computers with a manufacture, model and operating system for which AspenTech offers a supported version of the software, and that are controlled by the customer. "Sites" are customer facilities or locations specified in the license agreement.

AspenTech permits customer use of licensed aspenONE software in the cloud where: (i) the Platform Support specifications published by AspenTech for the relevant version of the software product include cloud support; (ii) only the customer has access to the licensed software hosted by the cloud service provider; and (iii) the user is accessing the software only from a Site specified in the applicable license agreement.

¹ For standalone deployments of Engineering products, server type I is sufficient

² EDR does not use any database servers. Deploys its own Access DB files.

When running software on a virtual machine, the machine should meet the same requirements.

If running standalone, 1280 x 800 is the minimum recommended resolution monitor for servers.

Your Aspen SLM Server must be installed and running prior to installing any V10 product.

We employ EMET 5.5 to harden our testing environments with the understanding that EMET will reach its EOL on July 31, 2018
